Brief description of the stationary RICE at the facility, including number of engines and the site-rated HP of each engine:

Stationary RICE at the facility is limited to one 251-kW (337 brake horsepower) diesel-fueled generator, which was installed in 2004. The unit provides electricity to an on-site shredder and baler for peak shaving and during power outages. The unit is operated for approximately 800 hours per year for peak shaving and 15 hours per year for maintenance.

I hereby certify that the information presented herein is correct to the best of my knowledge.
